Wedding days require an astute observer to record the story of your day. We seek to record those moments and details that will not only tell your story, but will interpret the look and feel of the day in a way that brings it to life.

**Picturing
life with you**

Welcome

Photography is not a job, it's a passion. The way your product is portrayed, the memories of your wedding day or capturing your child's smile are all highly emotive and important. At the Photo Shop, we have the skills and understanding to create the perfect image for you, but most of all we have the passion. We look forward to "picturing life with you".

Corporate & Function

Websites, brochures, annual reports - the right photography will get **your** message across.

Portraits

they grow up so quickly!

Portraits are wonderful gifts for loved ones. They may become family heirlooms, milestone markers, and even personal mementos for self-reflection and meditation. We create formal portraits and casual portraits, sharing the picturesque and spontaneous, and telling your story. Together we will create memorable images.

Architectural

They say a picture speaks a thousand words; well this is certainly true when it comes to architectural photography. Whether for a brochure, a sales catalogue or just for your memories, we will create stunning images of your home or business.

Commercial & Product

From food to a shampoo bottle, the way your product is photographed is vital to the way it is perceived. We know how to place, light and prepare your product to capture and present it at its very best.
